ATTACKED WITH MINES.

ST. PETERSBURG, Feb. 9.-Admiral Alexieff's official report of the attack by the Japanese is as follows: "I most respectfully inform Your Majesty that at or about midnight of February 8-9 Japanese torpedo boats made a sudden attack by means of mines upon the Russian squadron in the outer roads of the fortress of Port Arthur, in which the battleships Retvisian and Ceasaravitch and the cruiser Pallada were damaged. An inspection is being made to ascertain the character of the damage. Details are following for Your Majesty."

BERLIN, Feb. 9.- By Atlantic Cable.] A dispatch received here from Port Arthur says news has been received there that Japanese troops have been landed at Masampho.

SEOUL TO BE OCCUPIED. (BY THE ASSOCIATED PRESS-P.M.

LONDON, Feb. 9.—The Cheefoo correspondent of the Daily Mail cables that six Japanese transports are landing troops at various ports in Korea, from Masampho and Fusan, on the south, and Kunzan, Mokpho and Chemulpo, on the west.

Seoul is to be occupied and the landing is being covered by the torpedo division. The main body of the Japanese fleet, the correspondent concludes, will sail in the direction of Port Arthur.

GUNNERY EAST OF KOJE.

LONDON, Feb. 9.—In a dispatch from Tokio, a correspondent of the Daily Mail case the Jiff Shimpo has received a telegram from Fusan, Korea, declaring that the firing of guns was heard to the east of Koje Island (about twenty-five miles southwest of Fusan) at 8 o'clock Saturday morning.

PERMITS TO THE PRESS.

NAGASAKI, Monday, 6 p. m.—The War Department is issuing permits to correspondents. Baron von Rosen will leave Tokio February 11, and will sail by the French steamer Yana February 12. It is reported that the ice is two feet thick at Port Arthur, and that this affects the movements of torpedo boats, but it is probably only on the shoals and shore waters. A letter received from there indicates that the harbor was quite open up to January 31. The Japanese naval reserve has been called out.

RUSSIAN FLEET WILL FIGHT.

NAGASAKI, Monday, 9:20 p.m.—From a Russian source news comes that their fleet will fight. For months past many colliers have cleared from Kusatsu for Cheefoo, but have invariably landed their coal at Port Arthur. The Russian steamer Argun was due at Nagasaki today from Dalny, but has not yet arrived.

DALTIMORE, Feb. 8.—The burned district is D within the territory bounded on the west by Liberty street, on the north by Lexington street, on the east by Jones Falls, and on the south by the Basin. Within this district were the big structures on Fayette, Gay, Lombard, Charles, Balderon, Elliott, Hollingsworth and Cheapside streets.

Passing southeast along the Basin, the following large docks were destroyed: McClure's, Patterson, Smith's, Frederick's, Long and Union. Small thoroughfares which extend as far north as Lexington street, and which were in the path of the flames, are Commerce, Fredericks and Mill streets. The district thus swept by the fire comprised seventy-five blocks and nearly twenty-five hundred buildings, and is fully two miles square.

Included in this territory were a number of financial establishments of national repute, the buildings of Alexander Brown & Sons, the Continental Trust Company, the Union Trust Company, the Atlantic Trust Company, the offices of the Baltimore and Ohio, the Pennsylvania Railroad Company, the Maryland, Southern and Chesapeake Railroad Company and several steamship companies.

At O'Donnell's wharf, where a freight station of the North Central road is located, the flames fed all day on the inflammable trimmings of the annex to the power-house of the United Street Railway, the main building of which was gutted early this morning. The large buildings of the Miller Fertilizer Company, the Bragener Oil Company, C. M. gross assets to be \$3,608,155; its capital \$500,000, and its net surplus \$1,104,937. From this it will be seen that its net surplus-is entirely wiped out and a big hole has been dug in its assets. The Continental is said to have had outstanding policies amounting to \$7,708,903, which would wipe out its net surplus of \$5,718,962, and make quite an inroad into its assets, which are stated to be \$12,962,131. The Phoenix had policies outstanding amounting to \$4,-388,134, and its net surplus is \$1,758,155, but it can fall back on gross assets amounting to \$7,328,624. The Queen has a net surplus of \$2,535,553 with which to meet the amount of its policies, published as \$1,728,001. It would appear that one of the hardest hit companies is the German of Rochester, N. Y., which is credited with having outstanding policies aggregating \$1,073,033, while its net surplus is but \$491,090. Its gross assets reach \$1,461,993.

Should Manchuria be annexed to Russia, the independence of Korea would naturally be impossible. The Japanese government, therefore, being desirous of securing permanent peace for Eastern Asia by means of direct negotiations with Russia, with the view of arriving at a friendly adjustment of their mutual interests both in Manchuria and Korea, where their interests meet, communicated toward the end of July last such desire to the Russian government, and invited its adherence. To this the Russian government expressed a willing assent. Accordingly, on the 12th of August, the Japanese government proposed to Russia, through its representative at St. Petersburg, the basis of an agreement, which was substantially as follows:

"First—A mutual engagement to recharges that Japan's desire was to bring about war, no matter what was the tenor of the Russian reply, adds that even Japan's extraordinary manner of rupturing relations has evoked no chauvinism in Russia, but merely an outburst of keener patriotism.

vague talk to the effect that hostilities may be averted, this hope is regarded as so slender as hardly to be worth considering. Mediation is believed to be impossible, unless the two adversaries ask for it. Neither France nor Great Britain are in a position to offer their good offices, on account of their alliances and the distrust here of the United States would make it difficult for America to do so. In short, war is regarded here as practically inevitable.

I ONDON, Feb. 8.—[Exclusive Dispatch.] War in the Far East has definitely begun. Japan regarded the withdrawal of 'all her diplomatic representatives from Russia, of which she notified St. Petersburg Friday evening, as being equivalent to a formal declaration of war.

She then waited forty-eight hours before making a hostile move. She considered this a decent interval, all that courtesy and precedent required. Then, Sunday evening, she sent her warships to sea with orders to attack the Russian flag wherever it was found.

It is believed at the Japanese Legation here that the first blow has already been struck, although there is no definite information on the subject GOVERNMENT'S STATEMENT.

(CONTINUED FROM THIRD PAGE)

Upon Great Britain and France rest the great responsibility of averting a universal dispute among mankind, and that is a common task which every incitement of friendship, reason and duty must move them to fulfil."

Home Secretary Akers-Douglas, replying to a question in the House of Commons today, in behalf of the gov-ernment, informed the Liberal leader Sir Henry Campbell-Bannerman, that His Majesty's government had been officially informed of the rupture of diplomatic relations between Russia

His Majesty's government had been officially informed of the rupture of diplomatic relations between Russia and Japan, but it had no further information regarding the details than appeared in the newspapers.

Mr. Akers-Douglas added that the question of a belligerency law had been fully considered, but he declined to answer a nuwber of technical questions regarding instructions relative to coaling, repairs, etc., sent to the authorities at British ports without due notice of such questions.

The British Foreign Office does not regard the Japanese note, presented February 5, to the Russian Foreign Office by M. Kurino, as establishing a state of war, though it helds it would justify a hostile act without any further notification on the part of Japan. The course taken by the United States Embassy at St. Petersburg in undertaking to look after the interests of Japanese subjects in Russia was adopted because the British government regarded itself as being too intimately concerned in the dispute to accept such a responsibility. No such arrangement as suggested by the St. James Gazette (that a demand will be made that Russia must either grant Chinese sovereignty in Manchuria, or fight Great Britain and the United States,) is known of by the Foreign Office late tonight received news of the embarkation of Japanese troops. Finally, neither at the British Foreign Office, nor in any other diplomatic quarter, is any hope entertained that mediation could now be arranged.

SEIZED RUSSIAN STEAMERS.

A special dispatch from Berlin says ships, reported to be on the way to

Chemulpo, korea, nas seized several Russian trading steamers.

The St. James Gazette asserts on diplomatic authority, that, assuming Russia defeats Japan, she will be confronted with a demand for the acknowledgement of Chinese sovereignty in Manchuria from Great Britain and the United States, and that she must either grant it or fight both countries. An understanding, the pa-per adds, has been reached in this sense between the United States and Great Britain.

Ever since the Turko-Russian War it has been customary for the great neutral powers to hold some sort of conference at the conclusion of the war to assure the vanquished nation in the struggle against undue exactions and punishments. This was naturally the course in the Turko-Russian War, and attention is called to the fact that although Japan was the victor in her last war with China, the neutral powers, especially Russia and

victor in her last war with China, the neutral powers, especially Russia and England, brought pressure to bear upon Japan to prevent her from pressing her advantage beyond reasonable limits. Incidentally it was also pointed out that the two nations named profited themselves by the acquisition of the most important strategical points, which had been the object of Japan's operations.

which had been the object or Japan soperations.
Therefore, it is said to be within the probabilities that some sort of a conference will follow a Russo-Japanese war. The United States has always held aloof from combinations in such cases, but as in the cases of negotiations which terminated the Boxer troubles, the policy has been to work on parallel lines when such a cause is for the common good.

At the same department today officials declined to say how far the United States had gone or would go in this direction; but it is known to be the desire of this government that the Empress Dowager remain in Peking. The State Department has been informed by the American Embassy at St. Petersburg and the American Legation at Tokio that M. Kurino, the Japanese Minister to Russia, and Baron de Rosen, the Russian Minister at Tokio, have taken leave of the governments to which they were accredited.

Tentative orders have been prepared sending the cruiser squadron of the Asiatic fleet northward from Subig Bay in the vicinity of Port Arthur to observe the Japanese and Russian naval operations, and there to be at hand to protect American interests

[New York Evening Journal:] Great lawyers of the Brooklyn Rapid Transit Company have begun an analysis of the compaint of Mrs. Margaret Theoford, society leader of the Bedford section, and a diligent examination of its charter to determine the rights of pet dogs on street cars.

They have twenty days in which to file a annawer to the suit begun by the owner of Beauty for \$500 damages for the refusal of the company to allow the skye terrier to ride on one of its cars. Technically, the suit is for personal damages, for, of course, the little dog is unable to express his animal indignation in the proper legal form. It is the first action of its kind.

Lawyer John S. Griffith served the summons and complaint on President Winter of the railroad company.

Mrs. Thetford lives at No. 584 De Kaib avenue. Here is her own story of how she was compelled to carry her pet two miles in her arms:

"I took the car at De Kalb and Marcy avenues last Saturday afternoon to keep an engagement in St. John's place. As I was to be "one over night I carried my pet skye terrier. Beaut" in my arms. The conductor collected my fare before I had gone two blocks, and I showed him my permit for the dog at the same time. He looked at it, and said sullenly: This permit is no good after the 5th of February miss." I replied. It is not the 5th of February yet. He got very angry, and said, "Vell, it don't make any difference; you'll have to get off the car. lady. "I asked him why I should do that as I knew my permit was all right, and he said again, 'It don't make any difference; you'll have to get off, and he stopped the car. I was so indigment I did not know what to do, but got off telling him I would see about 'Nis. He yelled after me that that was my privilege.

BURBANK. James Neill is presenting at the Burbank this week what is probably his most powerful characterization—"Baron Chevrial," principal figure in "A Parisian Romance."

Chevrial is a type familiar to students of the decline of the older French nobility. Manhood is a tradition in him. goodness a positively regative accomplishment, and he is about to reap the reward of a life lived solely for pleasure. Premature decay has seared his countenance with the ineffaceable tracery of sin; he is old, inconceivably old, before his time. There is no lesson at all, hose ever, for as he grows older he grown more wicked.

Not a pleasant figure, but Neill interprets it with remarkable precision. His make-up, although slightly overdone, is a triumph. For once he gets away—miles away—from James Neill, and looks and acts the soured and decrepit Baron.

No scene on the Burbank stage in direct contrariness to the advice of his physician, gives a supper in honor of a ballet girl. Just preceding the banquet he is selzed with a severe attack, almost resulting in collapse, but he rallies, and insists on giving a toast at the table. Not content with this, he proposes another, and yet another. As he raises his glass for the final quant his ulterance becomes thick and almost unintelligible, his limbs fail him, and he staggers away to the support of a stairway. Recovering for the moment, he totters toward the banquet board again, and, catching at his glass with a low murmur of unmeaning gibberish, falls suddenly back in his chair, stone dead.

When the curtain call brought up the drop on the first night t revealed only the physician and the servants bending over 'the silent form. And then only the doctor; and at the last call the vacant chairs, and the rumpled finery of the table, the empty room, that still, staring figure lying horribly in its gay costum—and complete silence.

appears in an alleged ballet dress, very modest and decorous, and quite proper for any actress to wear. The antics of the ballet girls are not ferce. Sheldon Lewis deserves especial mention for his serious and effective work. In the "good" role of Henri Di Targy. Miss Gliman, the new ingenue, appears to need a little more experience. She is presented of a very pleasing personality, and has a good voice for lighter parts.

MASON OPERAHOUSE. "The Old Homestead," although it has been before the public for about a score of years, more or less, has the same attraction for all classes of theatergoers today as it had years and years ago. BOSTON DRY GOODS STORE.

239 South Broadway, Opposite City Hall, Los Angeles.

The early showing of new wash goods bids you welcome You will likely linger long over the manifold attractions, for in weaves and colorings and designs we show numerous lines so novel and so attractive in their bewitching daintiness that it is difficult to leave them.

## The New Wash Goods

You should certainly see them-it will be a pleasure, and it will also be informing, for we now show authoritative styles for next spring and summer wear.

(Wash Goods Department-North Alsle.)

Bates Seersucker is unnecesary to state the merits of this well-known fabric. We are prepared to show a more extensive line this season than heretofore. It is particularly suitable for house

dresses, separate skirts, and children's wear. It is 27 inches wide, 24c the yard. Punjab Percales

Being headquarters for staple material, we have endeavored to maintain this reputation by securing one of the most extensive and complete lines of Percales ever placed for public inspection. There is nothing that can displace this goods for wrappers, house dresses, and moraing shirt waists. As a tub material it is without a peer. We have all the standard patterns, 36 inches wide, at 12 to per yard.

Silk Striped Challies

This is an exquisite combination of wool and cotton which can hardly be distinguished from the silk and wool fabric of the same name. The designs are of the very latest, comprising the dainty Dolly Varden and Persian effects on white ground, overlaid with delicate auth stripe; other color combinations too numerous to mention, 30 inches wide, 35c per yard.

Etamine Waisting.

In this offer we have something decidedly new. The pattern and color conceits are among the very latest and most effective, being entirely different from anything we have shown heretofore, and especially designed as a high-class waist novelty. Our line is very large, and without doubt will appeal to you. 27 inches wide, \$1.00 per yard.

Many Special Prices in Force

In the Sunday announcement we printed special prices from a number of departments—Rugs, Portieres, Linens. Men's Goods, Ribbons, etc.

Los Angeles Agency for Fasso Corsets.

## Remnants Priced Ridiculously Low.

There is one place where a wide-awake dress goods man is always willing to lose money-remnants. Can't bear to have them cluttering up the stocks. 'Tisn't good business, might better give them away. And this sale is the next thing to an absolute gift distribution.

### Lot 1—Any Piece for \$1.45 | Lot 3—Any Piece for \$2.85

Jacket, skirt, waist and suit lengths from the best selling plain and fancy weaves of the season

Two to seven-yd. lengths in higher class fabrics including a lot of fancy wool waistings herete at \$1.45 for the piece. Some of them sold as fore sold at \$5 to \$12 per waist length, now \$2785 high as \$3.00 a yard, and the poorest were 50c for the piece. Black and all the right colorings

It's the accumulation of a busy season's selling—1 to 7-yard lengths of nearly every sort of fabric included in our Fall and Winter stocks.

But at those prices they'll find new owners before closing time tonight.

New Linen Suitings.

One of our windows shows a lot of the choicest linen suitings that have come off the looms this year-and they're to be sold at 75c a yard. They're 30-inch goods in crash and momie weaves; just the thing for skirts, as well as suits. Mixtures, plaids and stripes.

## THESE COME TO SEE US.

Fine Trainload of Visitors in from Oakland.

Eager to Learn Lesson of Southern Progress.

Hundreds Refused Tickets for the Journey.

The finest equipped train that ever pulled out of Oakland steamed into the Arcade depot at 12:30 o'clock this morning, bearing to Los Angeles 263 representative citizens of San Frano's sister municipality.

The object of this southern is to inquire into just how Los Angeles turns the trick of attracting the nspires a material development that s the wonder of other Pacific Coast

the excursion of this morning is the result.

At first it was the purpose of the Oakland Board of Trade to confine their party to 100, but the demand was so overwhelming the limit was fixed at 250. But that did not satisfy. Yesterday tickets were refused to 300 applicants for lack of accommodations. In the party are some of the most influential citizens of the "Village of Caks," millionaires, merchant princes, superior judges, men of letters with wives and daughters ready to sit at the feet of our southern metropolis and learn the lesson of material growth and hearty coöperation.

Record time was made throughout the trip. The train left Oakland yesterday at 8 a.m., making the distance between cities in a little over sixteen hours. Not an unpleasant incident marred the trip and the party that landed this morning was in the best of spirits. Mayor Olney follows the excursion party on the Owl.

As guests of the Chamber of Commerce the excursionists will remain until Saturday and the daily itinerary will be as follows;

Tuesday—9 a.m. Seeing Los Angeles, preceded by a reception at the Chamber of Commerce.

Wednesday—9 a.m. Trip over the

merce.
Wednesday—9 a.m. Trip over the linside Track" from Arcade depot, including Redlands and Riverside.

Thursday—9 s.m. Mount Lowe and

adjacent points.

Friday—Catalina Island and a visit to the "Marine Gardens." Train will leave the Salt Lake depot at 9:05 a.m.
Those making up the party are as follows:

The guiding genius of this excursion is Edwin Stearns, secretary of the Oakland Board of Trade, a former resident of-this locality. For two years Mr. Stearns has been the charge of the Cakland board and for two years has been telling his associates' how they do it in Los Angeles.

"Just come to Los Angeles with me and I'll show you how business menstick together. In every question of city development and how civic pride is fostered," has been Mr. Stearns's song; and he has sung it so efficitively the excursion of this morning is the result.

At first it was the purpose of the Oakland Board of Trade to confine the control of the confine the control of the confine the

It is estimated that there are 29,000,000 more or less active church members in this country. Catholics, of course, predominate in numbers over any one other sect. The Methodists have 5,500,000, Presbyterians, 1,600,000, Episcopalians, 773,000, Congregationalists, 633,000. The Unitarians have but 73,000. have but 73,000.

The era of great endowments is surely upon us. Colleges, churches, and parks and museums are getting money in chunks of four and six to 10,000,000 dollars from men like Rockefeller, Carnegie, Field, Gordon-McKay.

McKay.

Our religion comes high. Not the building of churches but the mere maintenance of all the churches in America costs us annually some \$260,000,000. Besides this we 'pay out something like \$75,000,000 into foreign and other missions and church work of greater or less practical utility. Without any irreverence or disparagement may it not be suggested that a very great part of this vast sum could be diverted into other channels of be diverted into other channels of greater moral and human benefit?

Our exports to Russia this last year amounted to over \$17,000,000, \$10,000,000 more than the year before and our exports to Japan amounted to \$21,-000,000, a decline of about \$1,000,000 from the year prior. From a selfish point of view, trouble between these two countries would greatly benefit our commerce.

In Chicago during the six winter months it is estimated that deaths from pneumonia will reach 2100, and those from consumption, 1300. The increase in the deaths from pneumonia in that city is something appalling.

Our German immigrants rank high in every way, Five thousand, eight bundred and eighty-two of them landed in New York one month last year they brought \$260,000 with them and only 103 were illiterate. The same month nearly 10,000 Italians landed, and they had but \$110,000 and 3710 of them were illiterate.

We know that Japan can put 600,000 men in the field tomorrow. In a short time she can raise 2,000,000 men and with mighty little effort can "borrow" and arm between 2,000,000 and 3,000,000 Chinese, who, if properly officered, make pretty good fighting retarial

BATTERY OF CONVERTERS FOR THE OLD DOMINION.

Another Pump Added to the Cop-per Queen at Bisbss—Owners of the Calumet and Arizons Smelter Putting in an Additional Furnace.

TUIGON (Aris.) Feb. 5.—F. W. Hoar has resigned as superintendent of the Old Dominion Company's mines and works at Globe, and has been succeeded by Dr. L. D. Ricketts, who will have

works at Globe, and has been succeeded by Dr. L. D. Ricketts, who will have charge of the merged properties of the Old Dominion and United Globe Mines companies. Dr. Ricketts has for years been assistant to Dr. James Douglas, general manager of the Phelps-Dodge Company, to which the United Globe, Detroit and Copper Queen companies are subordinate.

Great improvements are in progress around the Old Dominion. All the machinery for the new smelter and powerhouse is on hand, and is being places with the aid of a new electric crane. A battery of converters, for the purification of the sulphurous matte, is being placed. These are the first converters ever brought into the district, the greater part of the ores being free oxide and carbonate in character. A new air compressor of large capacity is in successful operation at the shaft head. An immense new flue dust chamber is being erected. Two electric locomotives have been received for use about the smelter. Hereafter the ore will be brought from the mines to the smelter by means of standard-gauge ore cars, and the present ariel tramway system from the main shaft will be taken down.

WORK SUSPENDED.

system from the main shaft will be taken down.

WORK SUSPENDED.

At Bisbee, work has been suspended on the Marquette and Arizona property, presumably till proper pumping machinery can be put in operation. One hundred and thirty feet of water is in the 500-foot shaft. Water is becoming an annoying and expensive condition in most of the prospecting shafts below Bisbee. The Modern company has started pumps and resumed. work. The Calumet and Cochise is down 575 feet and will drift on the 1000-foot level. The Portage Lake is to be prospected with diamond drill. The new four-compartment shaft of the Junction company is down 350 feet. Considerable carbonate ore has been struck, but the report of a great ore body was a mistake. The Pittsburgh and Duluth shaft is down 560 feet. There is no doubt that it will strike the main sulphide ore body about the 1000-foot level, as adjoining ground has already been developed at that depth by the Calumet and Arizona. A diamond drill is being operated on the Copper Glance property from the bottom of the 525-foot shaft. The Wolverine shaft is down 560 feet, with work hampered by water. A new air compressor has been put in, and new pumps are on the ground.

The Copper Queen company at Bisbee has added another pump at the old Czar shaft, an dupw is handling 1,500,000 galions of water a day. The new Gardner hoist of the company is to be the largest in the Southwest, even better than the magnificent hoist on its neighbor shaft, the Spray. At the Holbrook. Spray, Gardner and Lowell shafts of the Copper Queen, additions are being made to the ore bins, and every preparation for the new conditions that will begin when the new furnaces start, about May 1. Then it is expected that the present Copper Queen working force of 2000 men will be largely increased. From the Lowell shaft is being taken the finest sulphide ore ever known in the district, passing 50 per cent. In copper values, Shipments to Douglas are being made already.

ready.

ANOTHER FURNACE.

The Calument and Arizona smelter at Douglas has produced about 22,500,-000 pounds of black copper since blowing in last spring. Another furnace is being added.

About six carloads of ore a day are being sent from Tombstone to the El Paso smelter. Most of the ore is from the old dumps of the Lucky Cuss shaft. The main shaft of the Tombstone Consolidated Mines Company has reached a depth-of 720 feet.

Work is to be recommenced at once on the Commonwealth mine at Pearce, supposed to have been abandoned on account of the sinking of the older workings. A contract has been made by the management for 500 feet of drifting on the 400-foot level, in new ground.

W. L. Valentine of Los Angeles has bought in at Sheriff's sale the personal property of the Empire Copper Company, on the Colorado River, northern Yuma county, near Parker. Valentine had secured a judgment in the District Court at Yuma, against the company for \$3000.

Not especially. It is purely agricultural land and the methods of cultivation are prifnitive. A few gold mines are operated and there are supposed to be deposits of copper, iron and coal.

Why, then, does Russia want Korea? Chiefly because of its position, Korea is an extension of Manchuria, which practically belongs to Russia. In the natural development of contiguous territory Russian merchants have crossed the boundary into Korea and Russian interests accumulating there under the weak native government naturally look to the Czar for protection.

Why is Korea of strategic value to Russia?

For two reasons. First, Russian vessels must make a long detour around Korea to pass from Vladivostok, Siberia, to Port Arthur, the Russian harbor in Manchuria. In this journey they must traverse a narrow strait between Korea and a Japanese Island, comparable to Gibraitar. To insure free passage Russia seeks to control the end of the Korean peninsula. Second, when Russia begins its anticipated absorption of China it would be inconveninced if a hostile power should have a military base on the northeastern epast of Asia. Therefore it desires to annex Korea.

Why does Japan object to the Russian annexation of Korea?

Because Japan is overcrowded, with a population twelve times as dense as

Nor was this enough; they wore out several pairs of shoes getting down on him in other books, and the race owed them a coinfortable start in life, after Golden Rule had finished out of the money. This would have been enough trouble for one day, but in the fifth event another package was delivered, when Frank Chance and some other Chicago ballplayers who had seen Nitrate run around the Chicago tracks, unloaded a little of their surplus on the black horse. Lynch & Petton took it as a hunch and held Nitrate out for a while, the other books mostly loading up on him. Eventually they hung out 2 to 1, but overlooked some bets that would have looked good later, as Nitrate finished fourth, after a bad getaway. There was quite a picnic of holding out yesterday; Johnny Millin did his share of it, too, when he offered no price on Huapala in the last race, and bet on her besides. Phil Hamill, running the Schreiber book, also held out Golden Rule to his sorrow.

"Pittsburgh Phil" put down a number of good bets on Belle Kinney on the strength of her having beaten Schreiber's fleet Pinkerton in a workout Sunday morning. "Phil" won about \$5000 on the day.

A good card is down for decision today. The mile and a sixteenth handicap, carded fourth, bids fair to be a contest. Rag Tag. Fortunatus, Paul Whaley, Warte Nicht and Princess Tulane will be the contenders.

The jumping race yesterday went to Galba in easy fashion. The tip was out quite generally among the wise fraternity, and Galba's victory was a popular one. In the paddock, as Owner Corrigan inspected him, Galba did not look as if he felt a bit like running, but one cannot always tell that way.

vor?" he asked.

"If it doesn't cost anything, and you'll do twice as much for me," the crew replied.

"I want you to fly up in the top of that tail tree and pick off the bright red fruit and throw it down to me," the hippopotamus answered.

"What do I get out of this?" inquired the crow. "If that stuff up there is good, I guess I'll eat it myself."

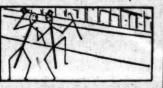

"Oh, this is my birthday, and I really ought to have some. Besides I'll do anything I can for you in return," begged Mr. Hippy.

"Haw! haw! haw!" laughed the crow.
"What could you do for me, you great

clumsy brute?" And he flew away to the tall tree, and began eating the red fruit, which didn't taste good to him at all, while the poor hippopotamus sat under the tree and wept great hippopotamus tears.

Again the crow laughed that strange laugh of his, but on the last "haw" he stopped midway. He was beginning to feel very queer indeed inside. He clasped his claws and shrieked. Then he had a most awful, awful fit right in among the red fruit. As he bumped and thumped about in the branches he knocked bunches and bunches of the red fruit down on Mr. Hippy. And Mr. Hippy never turned his head to see whether the crow died in the middle of his fit or whether he got well and crept away; it was his birthday, and he celebrated it by eating more of that delicious fruit than he ever had before in his life.

A few days ago, the jail at Lincoln, some distance from Kidderminster, admitted a tramp sentenced by the district magistrate to ten days for vagrancy. While the warder was preparing the bath, he noticed the tramp take from his pocket a small notebook, tear a leaf out of it, roll the paper into a ball and put it into his mouth. The officer pretended to take no notice of the action, and when he thought the warder's attention diverted, the prisoner ejected the partly chewed fragments into a dark corner of the room.

When the tramp had been removed to the total the tramp had been removed to the tramp had been removed to the tramp had been removed to the thought'd statesman. He said:

When the tramp had been removed to a cell, the warder gathered up and pieced together the tiny bits, and read: "I murdered her. God help me. Murder will out." On the same page were other references to the Kidderminster crime which convinced the authorities that they had the murderer. By the time the tramp had served his ten days' sentence, the police had completed their case and rearrested him on the charge of murder as he may be leaving the jail.

**PROJECTS** 

B. A. Fowler, president of the Sait River Valley Water Users' Association has been in Washington since before the extra session working to secure the passage of a bill allowing the people of Phoenix and vicinity to bond themselves to the extent of \$100,000 for the construction of a free freight and wagon road through the Superstition Mountains to the proposed government dam now being constructed, seventy-five miles east from Structed, seventy-five miles east from posed government dam now being constructed, seventy-five miles east from Proenix. The bill is now a law.

Mr. Fowler appeared before the Congressional committees and made an interesting and instructive statement of the entire Salt River reclamation project. The site selected is ideal for the construction of a great dam. The canon narrows down to a mere alit between towering walls composed of a tough sandstone. Enormous quantities of the same rock are at hand to build the dam as is also material for the 200,000 barrels of Portland cement which will be needed to combine with the rock and form an averiasting wedge for the holding back of 60,000,000,000 cubic feet of water. And finally the water of Salt River, as it has for centuries of centuries seten its course down and down

In which they were considered, will supply occupants for any possible vacancies which may result in the course of the next few years. Only physically strong girls are admitted to the service. They must be between the ages of 15 and 30, and be either unmarried girls or widness without children.

Every applicant must possess an education equivalent to graduation from an elementary school. In making the application for a position it is necessary to produce a birth certificate, school certificate, certificate, and persons in question, and a brief biography. The latter must have been written and constructed solely by the government work, as was done by the private lands under the supposed Salt River Valley Reservoir. Constructing Engineer Fellows, who has charge of this project for the government advises the department that about 60,000 acres has been signed up, and about 12,000 more promised, leaving only 8000 acres, and he believes no difficult. seventy-foot dam constructed at the South Fork narrows.

A reservoir site is being investigated on Battle Creek, which swells the flow of the Cheyenne, and which would probably reclaim some 20,000 acres mostly, however, private lands.

Spring Creek, another fair-sized stream, has a good dam site at Spring Canyon Pass. Here a dam 130 feet high would form a reservoir of some 1600 acres, which would irrigate 60,000 acres if the water supply proves 1600 acres, which would irrigate to, 000 acres if the water supply proves sufficient. "Most of the land in the reservoir," Mr. Fitch states, "is pri-vate; but little of it is cultivated, be-

ing used mostly for pasturage."

The government engineers are constantly finding that much land, either stantly finding that much land, either wanted for reservoir sites, or for reclamation purposes, is held in private ownership and either lies idia or is grazed. The question naturally arises, why is this land, once owned by the government, now held for grazing purposes when the various land laws contemplate either actual residence or reclamation? Under almost every project investigated by the Federal engineers large proportions of the idie project investigated by the Federal engineers large proportions of the idle land are found to have passed into the hands of private parties, who still take their profit, when the government comes upon the scene and provides water for the land, out of the future homemaker. The Secretary of the Interior is empowered under the irrigation act to withdraw lands wherever it is believed they can be irrigated by the government, but he cannot withdraw the entire public domain, and the withdrawals already main, and the withdrawals already made have aroused fierce protests from stock interests and speculators whose land-absorbing operations are thus curtailed. If these public lands which, during the next year, or the which, during the next year, or the next five years or the next twenty years, are to be irrigated by the gov-ernment should be held for prospective settlers, Congress must take the mat-ter in hand and reserve them from speculation. The only way to do this is to enact legislation which will wipe out the whole of the land plundering

Mr. Fitch describes a good reservoir site on Box Elder Creek, where a dam could be constructed eighty feet high forming a reservoir of about 1500 acres to store the waters of Rapid Creek, the largest stream flowing east-ward from the Black Hills, Box Elder Creek, and Elk Creek. The trouble here is that this land also in the res-ervoir is owned by private individuals.

Mr. Morton and his son, Frank Morton, died in the same house not far apart in time, about a year ago. Mrs. Morton was a member of Stanton W.R.C. The funeral will take place at 10 a.m., today at Pierce Bros.' undertaking rooms at Eighth and Flower streets.

Destroyed a Home.

Fire which originated from the explosion of a gasoline stove practically destroyed the home of the family of 8. C. Gardner, No. 112 South Rivera street, shortly after 5 o'clock yesterday afternoon. The fire started in the kitchen during the temporary absence of the Gardners and by the time it was discovered it had gained such headway that it was impossible to save the building. The firemen worked for an hour and confined the flames to the building in which they originated. The loss on the building will amount to 3700, on which there is 3300 insurance. The loss on the contents will reach \$150 more, without insurance.

COL. GREEN OF PASADENA LOSES

Retired Capitalist at Hotel Green One of the Burned Financial In

Apprehension of loss in the Baltimore fire caused no small amount of worry among several of the guests of the big hotels in Pasadena yesterday and the wires were kept busy with telegrams of inquiry, but no return answers were forthcoming. Col. G. G. Green of the Hotel Green was bearing the burden of a loss of \$20,000. "It was the large warehouse of my glass manufactury and although it is partially covered by insurance I believe the loss will be about \$20,000. I consider myself jucky that I am no harder hit and guess I can stand it when so many have lost their all. That insurworry than almost anything else connected with the fire. Just how many cents on the dollar some of the local companies will be able to pay will not be known for several days."

Col. H. A. Barry, a retired capitalist

Huralde wagered every cent he could get together in the world, mortgaged every wheel that would turn on his ranch and very mule that could bray above a whisper—all in the faith that rain would fall in two weeks.

If rain had not fallen last week he would have been ruined beyond the hope of ever getting on his feet again. It must be remembered too that at the time he staked his all there was not a sign of a ishower.

It was the apparent hopelessness of the situation that enabled him to corner the rain. -Hardly a farmer in all that part of

The whole landscape was scratched as far as the eye could reach in the panorama of these surrounding hills with Huralde's plows.

Before a drop of rain had fallen or there was a cloud in the sky, that little sawed-off Spaniard had sown nearly 3500 acres of grain land.

While most of the ranchers were chalding their heads at his folly. Hu

shaking their heads at his folly, Hu-raide had five or six big six-mule plows digging into his rented land as hard as the mules could pull.

"Didn't it tear you into a frazzle?"
Huralde was asked yesterday.
He shook his head with embarrassed disapproval. "No spik much Engleesh."
"Didn't it—you know—scare you,

worry you?"
"I stuck to it," said Victorine, with much dignity.

Yesterday Huralde was hurrying his teams out over his rented hills. Scrag-gly teams of five or six horses abreast and again of six-horse teams drawing LACE CURTAINS 75C per big harrows followed him around over the scarred hills. Huralde was running the seeder, pouring bag after bag of precious grain to be fed, into his rented earth.

Mr. and Mrs. Solomon, accompanied by another gentleman and his wife, happened to be in a slight crush near the door, when too many persons tried to go up the steps at once. Solomon noticed that a small man forced himself against him in front, and another small man did the same thing, on one side, but thought nothing of it, at the time. Just behind him was his friend, and a tall man, with an overcoat held high on his arm, pushed in between this man and Solomon, and it is supposed he or one of the two smaller men took the diamond stud from his scarf at that time, when they had him surrounded. The Immigration Plague.

We are admitting annually an immigration which equals in numbers the population of a great city, wholly unsified, in great measure ignorant, in great measure Asiatic, and drawn largely from the lowest and most backward populations of Europe. This unrestricted immigration, if not soon restrained, will before long affect fundamentally the quality of our citizenship. Owing to the looseness of our naturalization laws it now affects most grievously our electorate, pouring in upon us constantly in our large cities and towns a mass of unfit voters, many of whom obtain the great privilege, and become the tools of the worst and most dangerous political managers. It fills our labor market with the cheapest and most objectionable labor of Eastern Burope and Asia Minor. The presentation was in the nature of a complete surprise to the officer, who has falthfully guarded the district for seven years, and was witnessed by a score or more of prominent citizens.

Officer Foster had been told that a committee from the City Council would call at his home during the evening to inspect the signal system, but no inking was given of what would follow. After the guests had assembled Councilman Theodore Summerland made the presentation on behalf of the residents, taking occasion to praise the officer for his faithful services and assuring him of the highest esteem of every resident of the district.

The star is a particularly handsome one of solid gold, set with a solitaire daimond. It was originally intended to make the presentation last Christmas, but this plan was abandoned, as the jeweler could not complete the badge in time. Engraved on the reverse side is the following inscription:

Jail bonds may be submitted to the voters at the same time. An issue was discussed in the Council yesterday, but no action was taken. It is proposed to issue \$50,000 is bonds, buy the lot at the corner of First and Hill streets for about \$30,000, and make some improvements in the jail building with the balance.

Ross T. Hickcox, chairman of the Library Directors' Bond Committee, succeeded in obtaining from the Councilmen yesterday a week within which to present petitions and communications showing the trend of popular sentiment regarding the proposed issue of bonds for a library in Central Park. The Chamber of Commerce, the Merchants' and Manufacturers' Association, Municipal League and other organizations will be asked to address the Council on the subject. An issue of \$350,000 is desired by the library directors.

WEEDS AND RUBBISH.

VACANT LOT DIFFICULTIES. State legislation will be invoked by the Council in order that all the vacant lots in the city may be cleared of weeds and rubbish. This was finally determined yesterday, when a special committee, composed of President Bowen, Nofziger and Skilling, reported on the request of the Los Angeles Realty Board for an appropriation of 375 a month to carry on the work of their Nuisance Abatement Euranu. The committee report covers all the reasons for the new move. It reads us iciliave: "We most heartily agree with the Realty Board that some steps should be taken which will rid our beautiful city of the 'unsightly vacant lot,' but we seriously doubt the wisdom or good business policy of the city undertaking this task at its own expense; besides, it would be unfair to the citizens and taxpayers who take pride in beautifying their own premises, and it places a premium on the one who refuses and neglects to perform the obligations due from every good citisen.

"We therefore are of the opinion that the request of the Realty Board for 375 a month should be denied. Further, we believe that the burden of caring for vacant property should be borne by the owners thereof, and that the expense should be a lien on said property until paid, and that said work should be done under the supervision of the city. Your committee beg leave to say that they are now preparing a draft of a law which will in due time be submitted to the Council for consideration, and if you deem it wise, a recommendation asking the State Legislature to enact the same."

FAVOR STORM-DRAIN BONDS. FAVOR STORM-DRAIN BONDS.

The coterie of young Republicans who appeared in the brick competition under the name of "C. Forrester" won another victory yesterday when the Council voted not to cancel the storm-drain bonds. In the construction of these drains about 7,000,000 bricks will be required. The "Forrester" cantract provides that these brick shall be furnished the city for \$5.00 at thousand.

He says the system, as planned to cover the business section, will carry away underground storm water, crossing the drained area, resulting from a fall of nine-tenths of an inch of rain per hour. The drains would carry of the downtown streets all water resulting from an ordinary rainstorm.

Mrs. Porter was examined on a charge of embeasilement before Justice Pierce yesterday. The evidence was heard last Saturday, and the court rendered a decision yesterday moraing, dismissing the complaint.

A new complaint, making substantially the same charge, was immediately filed by the District Attorney egainst Mrs. Porter, in Justice Young's court. She was arrested later in the day by Deputy Constable Adams, and haled before Justice Young who released her on a bond of \$1500.

Mrs. Porter is accused by Frank J. Cusick of having embezzied \$450, which be entrusted to her for safe keeping. Cusick came out from the East some time ago with a bundle of money and was persuaded to invest a good part of it in a half interest in a saloon at San Gabriel. Ere long it was hinted to him that he had a wicked partner, and that there was a conspiracy on foot to swindle him out of his share in the saloon and the profits. Cusick alleges. Mrs. Porter persuaded him to give her a bill of sale for his half of the saloon, and he also had such implicit confidence in her that he gave her \$450 cash to take care of for him. He now charges that she has refused to make restitution of the money and the saloon. All she ever gave him, he swears, was 15 cents to get out of town.

Mrs. Porter at the examination testified that she paid back the money, and her testimony in this respect was corroborated by her mother and sister, who said they saw her make the payment. There was much conflicting twitting. Justice Pierce, in deciding the case in the defendant's favor, gave it as his

The franchise is for thirty years. The rental for phones is not to exceed \$36 a year for residences. This franchise is for the purpose of extending the Monrovia local telephone service to the neighboring villages and ranches.

LIGHT FOR DOWNEY. The Downey Electric Light and Pow-er Company was granted a franchise to use certain streets and highways in and use certain streets and highways in and around the village of Downey for the erection of a system of lines and conduits for the transmission of electric light and power. The life of the franchise is to be thirty years and work on the plant must be commenced within six months and finished in three years. WIDOW WANTS DAMAGES.

MRS, BENEDICT'S SUIT.

The trial of Mrs. Julia A. Benedict's \$50,000 damage suit against the Los Angeles and Redondo Railway Company was commenced yesterday before Judge Tork and a jury. Mrs. Benedict is the widow of Edwin W. Benedict, who was fatally injured April 18, 1903, as the result of a collision between a street car and an automobile in which he was riding, on Broadway, just below Fourth street. She is the mother of five children, ranging in age from 2 to 13 years, who were dependent on the father's support. The question of damages hinges on responsibility for the accident, the widow setting up the contention that the car was running at a high and unlawful rate of speed, making it impossible for the driver of the automobile to avoid being run down by the car. The plaintiff in the suit is represented by Attorney C. C. Wright. Borden & Carhart and Hunsaker & Britt appear for the railway company. Yesterday forenoon was spent in getting a jury. In the afternoon the taking of evidence was begun. The trial will probably last several days. MRS. BENEDICT'S SUIT. The trial of Mrs. Julia A. Benedict

Hosler subsequently came to the conclusion that he had made a bad bargain and sued Ross for \$10,000, alleging he misrepresented the value of his property in Florida. Including its loaded tender this locomotive weights 450,000 pounds, and can haul on a level track a train of loaded to are more than one mile long, equal to a weight of over 6000 tons.

"What is a decapod?" an engineer on the Erie road was asked by a protesting commuter. "President Underwood needs one for his fast express."

"A decapod," replied the faithful employs addressed, "is a lobster."

Whether he was aware of it or not, the answer was absolutely descriptive. The name was derived from those crustaceans which have ten feet and are deliberate of motion. The lobster has ten feet and moves slowly. The decapod locomotive has ten driving wheels and its slow. Isn't it singular that a lobster or crab should give a name to a type of locomotive that is reducing the cost of transportation somaterfally that even bankrupt railroads can pay dividends?

MRS. OSBORN

MINIONS OF THE LAW LED MERRY CHASE.

Officer Alexander Again Brings the Lady Into Court—The Court-house Deputies Get the Tip and Embrace the Opportunity to Serve

Mrs. Kitturia B. Osborn has been leading the minions of the law another merry chase.

When Policeman Alexander succeeded in serving a warrant of arrest on her a week ago, after a long sleepe, she promised to be good and appear in court whenever wanted to answer to a charge of violating a city heaith ordinance. She was released on her own recognizance to appear before Justice Chambers last Saturday, but she failed to show up.

Accordingly, an attachment was insued for her and yesterday morning Officer Alexander again sallied out to Fortieth street and Vermont avenue and brought her into court against her will, although she did not offer such strenuous objection this time as on the former occasion.

Mrs. Osborn explained to the court that it was through a misunderstanding with her attorney that she failed to appear last Saturday. The court would not trust to let her go again on her own recognizance, and required her to put up \$50 cash bail.

While she was seated in the court-room waiting for ball aloney to arrive, she was served with two summoness by Constable Cline, for her to appear in Justice Pierce's court to answer in sheet of the summon of the superior Court.

All there court officials had been anxious to serve papers on Mrs. Osborn for some time. Some of them had made trips to her residence, but found it most difficult to gain access to her. Deputy Constable Richardson once went to her house to serve an strachment in a civil suit. He was met at the door by her son or husband and informed that Mrs. Osborn was not at home. The officer had his suspicions, so he walked around the block and approached the houre from the rear. He found the kitchen door open and walked in, and there was the woman he was looking for. She was taken by surprise, and the papers were served.

But the officers were not always so successful Mrs. Osborn has been buildin, and there was the woman he was looking for. She was taken by surprise, and the papers were served. But the officers were not always so successful Mrs. Osborn has been building and selling houses. She purchased materials at various places and the bills were not always promptly paid. A number of sitachment suits resulted, and this is the reason the corstables have been chasing her and hardly ever successing in finding her. When it was learned that she was to appear in the Police Court to answer for an alleged misdemeanor, the officers at the Courthouse with papers to serve, saved themselves the trouble to go out to besiege her castle any more. They made an arrangement with Dave Martin, clerk of Justice Chambers's court, to give the tip whenever she came, or was brought in, and Dave did it.

Among the attachment suits filed against her is one in Justice Young's court by Carpenter & Blies for 38.21, on account of lumber. The mill men have levied on her real estate.

There are five such suits pending in Justice Pierce's court. The Los Angeles Mercantile Agency has sued on a calim, for \$155 and another one for an amount not learned. John Parker Lee levied an attachment for "\$150. The Mathews Paint Company has sued for \$254. And there are others.

With so many claims pressing her the lady's reluctance to see officers with papers to serve on her is not surprising.

Justice Pierce yesterday afternoon sustained a demurrer to one of the companiants against her in his court, on the ground that her husband was not

Justice Pierce yesterday afternoon custained a demurrer to one of the complaints against her in his court, on the ground that her husband was not made a party to the suit, but the court granted the plaifitiff leave to amend. It was stated at the Courthouse yesterday afternoon that Mrs. Osborn was negotiating a loan to settle all her indebtedness.

At 3 o'clock yesterday when the four-teen French crib women were taken before Justice Austin for the setting of the time for their trials, they were seated in the jury box. They made a full panel, with two to spare, and were

Labor "Leader's" Plight.

Alexander H. Boal, president of the
Sign Writers' Union, was yesterday
held in \$1000 bail to answer to a charge
of felony embessiement. Boal is
charged with having appropriated to
his own use \$134, which belonged to his
employers. Eddy & Hess, and it is said
they have a sure case against him, ajthough he entered a plea of "not
guilty," and put his case in the hands
of an attorney. The examination was
set for Friday morning at 9:30.

An example was made of George Gridley in Justice Chambers's court yesterday. He had been engaged in selling paste diamonds on the street, and was spieling the quality of his goods, when he was picked up for violating the city ordinance, which forbids hawkers of goods to call out the retits of their wares. He was picked as a warning to the spielers who make life miserable on South Spring street.

Warming Themselves.

Leo Areanas went into a saloon on Main street Saturday night and feloniously appropriated an overceat that hung upon a convenient peg. His hide had scarcely been warmed by the other man's beaver, when he was picked up for being drunk, and the coat looking too good for the other part of his ourfit, it was discovered that he had stolen it. Justice Chambers gave him forty days below to think it over.

Dave Lindley was on the search for harness early on Sunday morning, but as he desired to warm the inside of him, he chose horse harness with the idea of exchanging it for grog. He stole a bridle and lines from J. W. Mortimer, and "fessed up" like an inocent child, appearing to think it very funny that he had stolen the articles while he was drunk. He laughed continuously during the brief hearing, but he rubbed his eyes like a whipped boy when he heard the judgment of fifty days pronounced. He went sorrowfully to his doom.

The walls of the Ruskin rooms showed a display of the many valuable etchings, paintings and art treasures in general, which have been acquired from time to time, and to each of which attaches some separate and interesting history, which was happily told by Mrs. W. J. Washburn. Here was shown a handsome painting of the lotus flowers of Egypt, presented by Mrs. Mary Stilson, and reminding them of the long time spent in Egyptian studies, while there was hung the picture of "An Unknown Woman," painted by a member of the club years ago, and bearing a charmed life through moves and accidents, which had destroyed a Homer, and effectually disposed of a Venus. Many gifts and their givers were gratefully remembered. Pictures, and a jar of honey from Hymmettus, from Mrs. Wigmore, who had always remembered the club in her travels. Mrs. Ira O. Smith had also thought of it abroad, and is soon to present another picture. The Columns of Luxor, to the club's collection. Ivy from the grave of Ruskin had been brought by Mrs. Robert J. Burdette, and was framed and hung underneath the portrait of the master. A beautiful colored copy of the frieze of the prophets by Sargent, was also mentioned as the gift of Mrs. Kanst, and lastly the gavel was proudly displayed, having been presented to the club by Dr. Palmer. This gavel is made of wood from the Holy Land and was the one tendered by the Ruskin Art Club to the General Federation of Women's Clubs for the opening of the last blennal meeting, which took place in Los Angeles two years ago. Books and programmes were also enumerated among their treasures, as well as many precious memories.

The first place on the programme was given to a clever and interesting paper read by Mrs. H. G. Brainerd, who told of wood engraving and many delighted to sail. Around the roses and violest that feetoned the memorable exhibit of American wood engravers, which had been shown in Faris and brought to a clever of

Mrs. Erima Greenlesf gave a clever and characteristic talk upon James Lane Allen's book, "The Mettle of the Pasture." She treated it in a series of character sketches and brought out the way in which each one manifested the mettle of the pasture.

Mrs. Harriet Wright chose to review Gilbert Parker's. "Right of Way," and stated that the subject was so happly selected and so skilfully treated with such sure instinct of artistic touch that it might well be considered a masterplece of fiction. "It is vigorous in production," said Mrs. Wright, "refined in taste and deep and subdued in feeling, while the splendid characterization touched as it is with the light of a creative imagination gives it a place among the immortals."

Mrs. Wright's entertaining criticism was followed by a fair and able review of Mrs. Stetson's. "Home," by Mrs. George, Rice, who certainly showed many things to be admired in this book, which has caused such a hubbub of discussion, both pro and con.

You Can Depend Upon and Why.

My treatment goes to the very core. There are few chronic conditions that will not yield to reliable treatment directed at the EXACT CAUSE.

**Functional Decline** . Nerve Weakness

Not all chronic diseases are caused alone by nervous weakness. True organic diseases are rare. The disorders of vital organs are functional, there is seldom any other cause. A cure can come only by removing the exact cause, and all symptoms disappear. Nerve weakness, grown chronic, causes functional decline and weakness the organs. My aim is to remove that cause and restore functional order and I belleve the treatment I employ is the most effective known.

Functional Decline Termed Weakness by Some The success I have had in restoring functional darangement by treating the "Exact Cause" has been a great surprise to many who had met with failure in former treatment. It's the right treatment applied in the right way that brings the astisactory results. By my direct method all inflammation is removed and free, healthy direction is established.

DR. MORTON, FOURTH AND BROADWAY.

To but partially cure these diseases is worse than no treatment at all. The chronic stage is sure to follow, and complications, such as ulcers, stricture, prostatic inflammation and bladder trouble is generally the result. Be sure your cure is chorough. With my method, which is the most cleanly and healing, one week to ten days is sufficient.

Under the influence of his great desire for the dosestic happiness he knew not, he got married some more—married Mabel, who left a man's shirt unwashed and went to the clergyman's with him. This was on December II, 1903; and now, after barely five weeks of matrimoniai bliss and loving, wifely support, George has been arrested for bigamy, I do not know how the cold, callous and unfeeling law will tract George—as likely as not it will immure him in a bastile—but he may bet Mabel's last laundry receipts that he has my sympathy. I, too, know what it is to be tired, and to yearn for rest and support and all the rest to have a support and all the rest of it. Stood True to His Trust.

[Bisbee (Aris.) Review. Jan. 3.

1904:1 Not that he should be specially commended for the act, for he simply did his whole duty, and that was part of his profession as a newspaper man, M. V. Donaldson, a reporter for the Los Angeles Times, stands as the example of what the real stuff is and should be in a reporter.

Mr. Donaldson was summoned before the grand jury in a case at Riverside, Cal. and was agked as to the source of his information in his report to his paper in a "grafting" charge which The Times had openly made against officials. Mr. Donaldson stated to the court that he wished to do what was right, but that he coalid not divuige the name of his informant. Then the wise owl upon the bench [Judge Noyes] threw the reporter into iail, and under his instructions the sheriff made it as bad as he could by throwing him into the steel tank, infested with vermin of every description, and where he remained until the next afternoon, and was then released by another judge on a writ of habeas corpus, who preperly held that the reporter was not obliged to furnish the name of his informant.

Of course. A reporter gives his information to his employer, and the true reporter never deceives his chief. The paper is responsible for what the proprietor, or his repesentative, the editor in charge, permits to enter the columns. It is the rarest thing in the world that the reporter of a paper will abuse the confidence reposed, in him, when information is so given. There have been cases where the knowledge gained in a newspaper office by a reporter has been used other than legitimately, but seldom is it on record. When a man does that he usually finds his way to the level where he belongs, and the obscurity from whence he came, and without the assistance of any person. The judge that sentenced Donaldson for contempt of court [Noyes] received a stinging rebuke from the judge who released the reporter on habeas corpus.

EASTERN PEACHES KILLED.
Severe weather in the East is reported to have killed not only the coming crop, but many trees. These reports come from reliable authorities in several different States and tell of damage to plum and cherry trees as well as to peach trees. Reports from Georgia, Delaware and Michigan are more hopeful, although Delaware growers fear that damage has been done.

BUSINESS IN DRIED FRUIT.

NEW YORK, Feb. 8.—[Exclusive Dispatch.] Within the past few days the spathy which has characterised the attitude of most buyers of dried fruits has disappeared, and while pro-nounced activity is still lacking, the nounced activity is still lacking, the movement shows a decided improvement compared with what has been doing in this line since the beginning of the year. The incentive to speculation appears to be less than for many years at this time, and transactions therefore reflect for the most part only the passing requirements of distributing trade. SAN BERNARDINO. Feb. 8.—Mrs. Amelia Simpson of Saif Lake City and her family of five children arrived here yeasterday afternoom in destitute circumstances. having come overland, crossing the Moapoo Desert in the region where thirty human bodies were recently found by a Sait Lake surveying crew. Mrs. Simpson and her party suffered intensely from thirst, having for two days at a stretch to go without water. She claims she left Sait Lake city under false pretenses, and of defrauding his innkeeper. Keller, in the course of his hypnotic exhibitions at Merced, induced a young boy, familiarly known as "The Cherokee Kid," to submit to his power, and while the lad was in the trance Keller ran a stout cambric needle completely through his lower right jaw to prove to the audience that seriadion was gone. Later the jaw began to swell, and the hop hand. He was ambitious, he said, to make an overland trip to Southern California, and stated that it would require only six weeks to reach Loc Angeles, she declares. Instead, they were twolve weeks on the way, four of which were spent in the heart of the Majave, where they came across the body of a man who had died of thirst and gave it a burial. A little further on they saw eleven graves in which had recently been buried some of the men found by the surveying party. Mrs. Simpson's wagon caught fire near this place, and she would have perished with her 3-year-old child but for the guick action of her two little daughters, who snatched the linfant from the fames, and aroused her. At Daggett Brisco deserted the family, it is claimed, laking his wife along, and leaving Mrs. Simpson absolutely penniless. She sold have horse and wagon, and with her children came here, the expense by train sating up all the proceeds from this sale. They went into camp beneath a miserable tant, the rain basing upon them, and in this deplorable plight they were found by Policeman Ciarke, who quickly relies of this city and Colton were shaken considerably vesterday hy

Moving Historic Santa Barbara Adobe Landmark.

SANTA BARBARA, Feb. 3.—In the fistory of matters architectural no more unusual undertaking has ever been attempted than the moving of a large adobe building, which is now in progress here under contract with the Natural History Society of this city by J. J. Greville. The building is one familiar to all lovers of old Santa Barbara, and has been the Mecca of the tourists from the time that genus first invaded the town, as having formerly been the headquarters of Gen. Fremont, after his capture of the city in 1846. The building, though once pretentious, has recently been going to decay, and the Natural History Society is having it moved to save it as one of the relics of this historic city. The building was, until recently, owned by Dr. H. Herter, who has donated it to the society on condition that it be removed, as he is about to erect a mod-

It is reported that the contractor will lose money on the undertaking, as he is to receive only \$600 in case he makes the transfer successfully, and it is estimated that it will cost him all of \$700 to do the moving. Mr. Grevills would not deny or affirm this today, but smiling pleasantly, said he was trying to help the society out a little. During the heavy rain of Friday bets were freely exchanged among the tourists on State street as to the probability of there being snything left of the ancient landmark save a large sized mud pie, but Saturday morning found the building intact, in spite of its denuded and exposed condition.

It will begin the line of march again tomorrow and will soon be in place on the new site, or so at least says Contractor Greville. It is understood that Dr. Lorenzo G. Yates, the precident of the Natural History Society, and whose dental offices were in the building in the earlier days of Santa Barbara, was instrumental in securing the valuable relief from Dr. Hersey

ANTI-SALOON LEAGUE AT WORK IN VENTURA COUNTY.

Several Secret Arrests Made on Charge of Selling Liquor Without License and Sensation Caused. Great Interest Taken in Water De-

(SPECIAL CORRESPONDENCE OF THE TIMES.)

VENTURA, Feb. 8.—The Anti-Saloon
League of Southern California is at
work in this county, and has created a
sensation by its latest action, that of
arresting several persons on the charge
of selling liquor without a license. Today Wheeler Blumberg of the wellknown Wheeler Springs, was arrested
by Constable Fordyce on a warrant
sworn out before Judge Bowling by a
man named C. F. Barney. Now everybody is trying to find out who C. F.
Barney is. Last week, in a quiet way,
warrants were served upon Joseph
Linnell and W. Hankins of Hueneme
for the same offense. These arrests
of Blumberg has proved a regular
bombshell in all circles. It is known
now that Barney has been at work in
the county trying to head off and detect illicit sellers of liquor for more
than a month, but so thorough have
been his methods that no one. "turnthan a month, but so thorough have been his methods that no one "tumbled." It is thought that he is in the employ of the Anti-Saloon League.

All the saloons in the county outside of incorporated towns were "closed" months ago by the Supervisors, but the temperance people have suspected that the law was not obeyed. It is said that there are wavening out for a numerical supervisors.

chat there are warrants out for a number of other alleged illicit sellers. The offense of Blumberg is said to have occurred January 4. The penalty for violation of the law is thirty to one hundred days in jall, or \$100 to \$200 fine, or both. FAIR CROPS.

dred days in jail, or \$100 to \$300 fine, or both.

FAIR CROPS.

This county, generally speaking, will raise fair crops without another drop of rain. Particularly is this the case in the Santa Paula section, in the neighborhood of Saticoy, and upon the great Colonia Rancho, in which is located the sugar factory town of Oxnard. F. W. Train of the latter city told a Times reporter today that every rancher in his section who can is turning his attention to the development of water, and the best way in which to get the water upon his land. "The factory people," said Mr. Train, "are taking a lively interest in the development of water by means of artesian wells. Good artesian water can be had all over the great rancho at depths varying from two to four hundred feet, and nearly every rancher on the tract has a good well on his place. The sugar factory people have put down a number of these wells of all sizes, and what with water ditched from the Santa Clara River by way of the big Schlappapietra ditch, some \$,000,000 gallons of water has been obtained for use daily for irrigating. This water is offered free by the factory to the farmers who will contract to grow beeta. So it may be seen that a large acreage can be grown, say from thirty to forty thousand acres, including what may be covered by individual pumping plants."

Mr. Train says also that twenty-five or thirty private pumping plants have been put in by ranchers, among them being the largest of the kind in the county, put in \$\text{purple glants}\$ are the Mautharts and James Leonard, R. B. Edmondson, and others. At Santa Pauls in this county several carloads of gasoline engines have been received recently and Installed by farmers.

RAIN, BUSINESS AND ADVERTISING.

A Chance to Figure.

Here is a novel and interesting thing!

"Liners," including "Wants" and other cla with the resultant business activity which will follow rains in the Southwest, crease somewhat in number and volume in all Los Angeles newspaper

barometer of the community. The Times regularly prints more "Liners" than any paper in the United States, barring only the New York Herald.

Beginning with Sunday, February 14, The Times is going to test the judgent of people who are watching business conditions in Los Angeles, and the classified announcements that will appear in each of the five Los Angeles daily newspapers during the week ending February 20. As a guide upon which to base estimates, The Times printed for the week ending January 30, a total of 8438 separate classified announcements. The total number printed by the other four Los Angeles newspapers [two morning and two evening] during the same period was 6806.

MY ESTIMATE:

Corporation Counsel Makes State-ment Indicating that There Was no Snap Judgment and that City Gave Abundant Notice of Intended Action.

WHITTIER, Feb. 8.—On the ground that the city's revenues from the business licenses should not be held up indefinitely, and for other reasons, an officer of the municipality holds that F. A. Jackson, the liveryman in jail here, has been fairly treated by the municipality. Jackson is serving a term in the City Jail under conviction of having not paid his business license tax.

"There was no agreement between me and the attorneys for Mr. Jackson to postpone action on the case until the April term of the Supreme Court in Los Angeles," said City Attorney George H. Woodruff today. "I have not recently had any conversation at all with Mr. Owens, one of Jackson's attorneys. About two weeks ago Everett Cooper, the other attorney for Mr. Jackson, asked me to c. asent to such a continuance. I told him I would take the matter under considedation, but did not believe the continuance ought to be granted. A week later Mr. Cooper came to me again and I told him I would edation to be granted. A week later Mr. Cooper came to me again and I told him I would edate a see had been pending for a long while and that the best interests of the city demanded that we should consent to no such delay. "When Mr. Jackson refused to pay his license last year I told him that everybody knew he was keeping a livery stable even though he wouldn't admit it. I suggested to him that the case be put in shape so he could be taken into custody by the City Marshal and that he then could at once be released on habeas corpus, and the case could then be taken through the courts on its merits, without delay, Mr. Jackson positively refused to make such an agreement. When addressed for not paying his license he demanded a jury trial. The jury disagreed. A second jury convicted hi:... He appealed to the Superior Court and that court affirmed the decision and sustained the ordinance.

"Meanntime while the case was pending the City Trustees instructed the City Marshal to suspend the collection of all business licenses. The feeling was that if the ordinance was not constitutitional we did not want to make the collections. When the Superior Court sustained the ordinance was not constitutitional we did not want to make the collections. When the Superior Court sustained the ordinance we felt that there was no sequite reason for waiting longer and the City Marshal was instructed to proceed with the reliactions. LARGER COLLEGE CHAPEL.

CLAREMONT, Feb. 5.—After thirteen years of service as the principal auditorium of Pomona College, Holmes Hall chapel will be enlarged. Through the added munificence of the original New England donor, \$5000 has come to be expended in extending the capacity of the building. Holmes Hall was built in 1891, at a cost of \$25,000 outside of furnishings, a gift to the college, as a memorial to Cyrus W. Holmes, Jr., by Mrs. C. W. Holmes, and Miss Edgar Holmes, of Massachusetts. A few years previous, Summer Hall and 300 town lots were presented by three Pomona elitisens, who took a note for \$5000 from the college; this building formed a nucleus about which, subsequent years have seen the college grow.

The gift for enlarging the chapel was secured by Rev. C. B. Summer, financial secretary of the college, who returned from the East last week.

Owing to the recent rain of 1.11 inches the Del Monte pumping plant machinery has been shut down two weeks for overhauling. CLAREMONT.

FOUR BURGLARIES.

REDONDO, Feb. &—Last night four of the principal places of business on La Alameda street were burglarised. In Kirkwood's poolroom \$17, a box of gum and cigars were taken. The Cutler Company's store was robbed of gloves, hats, shoes, suspenders, and between \$40 and \$50 which was left in the register. Mrs. L. Clary's restaurant was forced open, but nothing was disturbed. May's drug store was tampered with, the screening in the rear of the building having been torn off, but an entrance was not effected. The Columbia saloon, Wagner & Langer, proprietors, was also entered and a few cigars and several drinks taken. The alarm was given this morning at opening time, and Marshal Maxey started out to investigate. He examined several parties, but no evidence was found to hold them.

JELLYFISH WORKS A PUMP.

AVALON, Feb. &—The variety in jellyfishes seems endless. Every few days someone brings in a new form. Some are colorless and almost formless, but many are most artistically and beautifully colored. The latest specimen now at the aquarium, in addition to its brilliant coloring, is peculiar in that it keeps a pump in operation which caues a flow of water to pass around its sides at a rate which must mean four or five miles an hour. The fish is flat and has something of the shape of a large Indian arrow head. Around the outer edge is a band of the brightest royal purple; which changes its hue with a change of the view point. In the center of its anatomy is a little duct reaching from stern to stern, which is a genuine kaleidoscope and shows about all the colors in the rainbow, viewed from different points. It is a sure-enough novelty.

Miss Mary Fraieigh of New York proved herself a successful angles flat.

Miss Mary Fraisigh of New Tork proved herself a successful angler Saturday, with her father, C. P. Fraisigh, she was out in the Nestella trolling about the bay when a yellowtail struck her hook. It was her first experience at fishing, and when the line began to run out and the reel to sing its song she thought her whole tackle was lost, but after losing a few hundred feet of line she got the better of the fish and eventually, after a twenty-minute, fight, brought it alongside the boat. She is having her trophy mounted.

DALLERINO'S

CRIB KING MADE RICH MAN OF CLERK STOCKWELL

two Thousand Dollars, but Honest Clerk Would not Accept so Much Filthy Lucre as a Present.

Bartolo Ballerino's jail sentence has rattled him so badly that he has become positively reckless with his money. In his excitement following conviction and sentence for renting property for immoral purposes, he drew his check for \$22,000 and handed it to Wallace W. Stockwell, clerk of Justice Austin's court, to satisfy the balance of a ball bond of \$2400, \$200 of which was already in Mr. Stockwell's possession.

possession.

Ballerino's check at the bank is said Ballerino's check at the bank is said to be good for any sum up to \$200,000. Stockwell could have had the check cashed, satisfied the ball requirement and pocketed the change, which would have amounted to the snug sum of \$19,800.

But the honest cierk would have none of the filthy lucre derived from the wages of sin. He returned the big check to the wealthy crib owner, and asked him to draw one for a smaller amount.

check to the wealthy crib owner, and asked him to draw one for a smaller amount.

When Ballerino and Wiot were arrested on the charge of renting a crib to Rose West for immoral purposes, they were required to give \$100 bail each, and Ballerino put up the cash for both. After conviction and sentence they gave notice of appeal, and the court required them to give bail in the sum of \$1200 each. The \$200 already in the hands of the clerk of the court was applied to the new bail bond, and Ballerino gave his check for the balance, \$2200, but he made the check payable to the City Clerk. As the City Clerk had nothing to do with the matter, Stockwell would not accept the check in that form. The error was corrected by scratching "City Clerk" and writing Stockwell bresented the check at the bank a cautious teller turned it down, it being a rule of the bank never to cash a check for such a large amount when the name of the payee has been changed.

The check being unhonored, Clerk

without looking closely at the figures, and started to the bank to get it cashed, but on the way noticed that it called for ten times the amount required to somplete the ball.

Stockwell's medicasses as close of the for ten times the amount required to complete the ball.

Stockwell's predecessor as clerk of the court. W. W. Everett, levanted several years ago with about \$3000 of money entrusted to him as clerk of the court, and Stockwell, who was one of Everett's bondsmen, had to help to make up the amount of the embezzlement. Here was a chance for Stockwell to get even. But Stockwell took the check back to Ballerino and told him it wouldn't do. The old man thought it strange that he bank would turn down his checks and began to suspect that the court clerk was tricking him. But when Stockwell showed him the big figures on the last check, Ballerino made a grab for it and tore it into a thousand pieces. Then he drew a new one for \$2200 and showed it to his attorney, pieces. Then he drew a new one for \$2200 and showed it to his attorney, Maj. Horace Bell, to make sure that it was all right before letting go of it. THE NEW THOUGHT.

Rev. Benjamin Fay Mills Talks on the Subject to a Large Audience.

Rev. Benjamin Fay Mills spoke yesterday twice in Blanchard Hall to large audiences. Every day from 12:15 to 12:45 he will give a talk on "The Inner Meaning of the Sermon on the Mount." His subject yesterday afternoon was "What is the New Thought?" He described the new thought as "the recognition of man's ability to intelligently express the universal will." God is in all things, but is manifested to a greater degree in man than anything else that man knows. Man can so come into relation with God that he can live a satisfactory life now. If God is best revealed within the soul of man, then by knowing himselt, a man can attain joy, peace, character and practical powers. This afternoon Mr. Mills will speak at 3:30 on "The Source and Secret of Health." Rev. Benjamin Fay Mills spoke yes-
